WHAT'S INCLUDED IN THE KIT

Every Outback Solar Pump kit comes complete with premium components, carefully selected for performance, reliability and ease of installation.

1

OUTBACK SOLAR PUMP & MOTOR

High efficiency helical rotor pump with brushless DC motor & 40m pre-wired cable

2

AC/DC MPPT SOLAR PUMP CONTROLLER

Advanced MPPT technology for maximum water output and built-in system protection.

3

3 X 450W SOLAR PANEL

High efficiency, durable panel built to perform in tough Australian conditions.

4

40M SUBMERSIBLE PUMP CABLE

Heavy duty submersible cable with plug & play connector

5

40M STAINLESS LOW LEVEL BORE PROBE

Stainless steel probe with 40m cable for dry run protection.

6

2 X 3M MC4 CONNECTORS

Pre-terminated, waterproof connectors for quick and secure solar connections.

7

25MM 304SS CHECK VALVE

Stainless steel check valve to prevent backflow and protect your pump.

8

INSTALLATION GUIDE

Step-by-step guide to help you install with confidence.

9

PREMIUM PACKAGING

All components securely packed to ensure safe delivery.

BUILT FOR RELIABILITY

Every component in this kit is selected for quality and compatibility, so you can install with confidence and pump with peace of mind.

TRAILBLAZER

3" 1000W

HIGH-FLOW BORE SUBMERSIBLE SOLAR PUMP KIT

The Outback Trailblazer 1000W is a high-output 3" AC/DC solar submersible pump designed for applications requiring very high flow rates with moderate lift. Using a centrifugal pump design with a large 1.5" discharge, Trailblazer delivers up to 67 litres per minute, making it ideal for fast tank filling, water transfer, and high-demand irrigation.

Powered by a high-efficiency brushless DC motor and controlled by an intelligent MPPT solar controller, Trailblazer operates directly from solar power with no batteries, no inverter, and minimal maintenance – perfect for remote and off-grid installations.

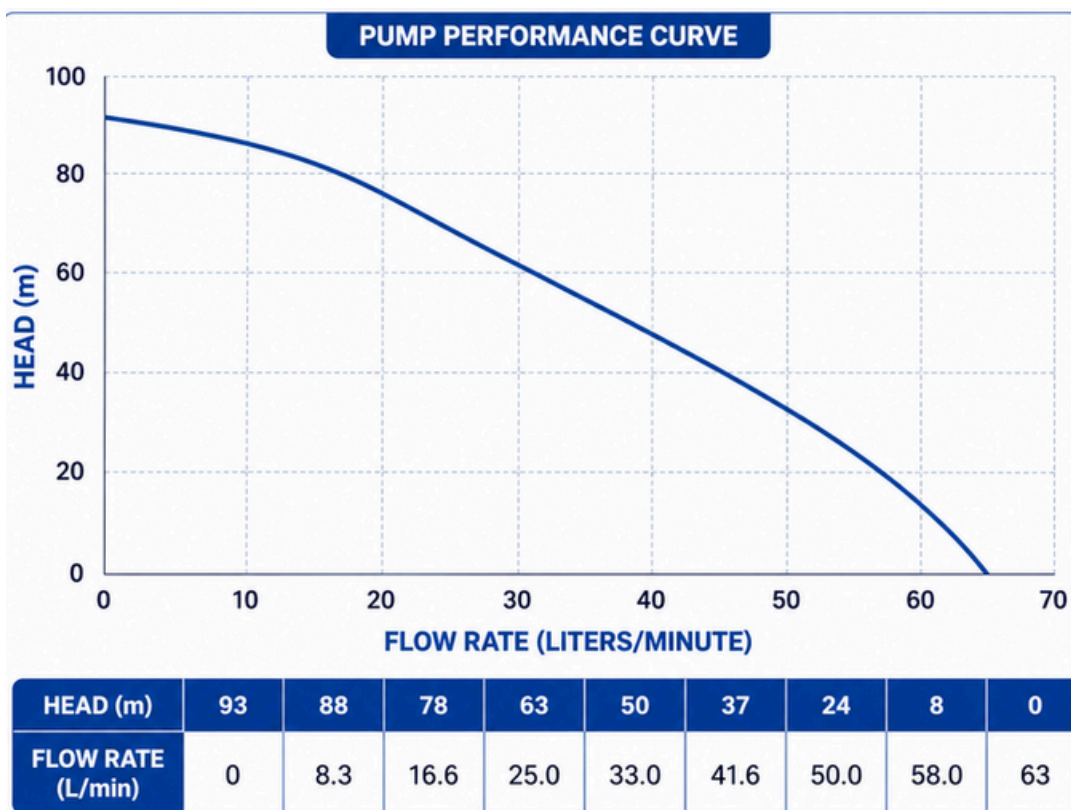

SPECIFICATIONS

Model	Trailblazer 1.5-93
Power	1000 W
Voltage (Vmp)	60 – 165 V DC
Maximum Input Current	10 A
Outlet Size	1 1/2" (40 mm)
Maximum Flow	67 L/min
Maximum Head	93 m
Pump Diameter	75 mm (3")
Pump Length	630 mm
Net Weight	6.2 kg
Protection Rating	IPX8
Insulation Class	F
Water Temperature	0 – 40 °C
Sand Tolerance	120 g/m3 Max

Specifications are subject to change without notice.

PERFORMANCE CURVE

KEY FEATURES

- Brushless DC motor
- Run-Dry protection
- High efficiency
- Low start voltage

APPLICATIONS

- Solar MPPT controller
- Stock Watering
- Light Irrigation Support
- Domestic Water Supply
- Off-Grid Locations

TECHNICAL SPECIFICATIONS

The Outback Trailblazer uses a stainless steel submersible pump body, brushless motor and high-flow hydraulic design built to deliver stronger water output under demanding conditions.

HYDRAULIC DESIGN

Pump Type	Submersible bore pump
Pump Design	Centrifugal
Water Source	Bore, well or low-yield
Application	Stock watering, tank filling
Operating Style	Direct solar operation
Water Delivery	At steady pressure

MOTOR & PUMP CONSTRUCTION

- ✓ Brushless DC (BLDC) motor
- ✓ Rated Power: 1000W (1.0 kW)
- ✓ Motor Efficiency: Up to 85%
- ✓ Motor Speed: 500 – 4000 RPM
- ✓ Waterfilled encapsulated motor for superior cooling
- ✓ Maximum Water Temperature: 40°C
- ✓ Centrifugal design with AISI 304 stainless steel and thrust bearing system for reliable pressure performance

PUMP CONSTRUCTION OVERVIEW

MATERIALS & BUILD QUALITY

- 🛡️ 304 Stainless steel construction
- 💧 Corrosion-resistant internal components
- 🔧 Silicon carbide mechanical seals
- ⚙️ Heavy-duty thrust bearing system

Built for durability in harsh environments where reliability and longevity are critical.

CENTRIFUGAL IMPELLER ADVANTAGE

The centrifugal impeller design allows Trailblazer to move larger volumes of water efficiently, making it ideal for fast tank filling, stock water transfer and irrigation applications where higher flow rates are required.

Performance figures are based on optimal conditions. Actual performance will vary depending on installation, solar input, and system configuration.

MAXIMUM ENERGY YIELD
More power output throughout the day, every day.

TRUSTED RELIABILITY
Built to perform in tough Australian conditions.

ENGINEERED TO LAST
Proven technology for long-term peace of mind.

SMART INVESTMENT
Lower operating costs and higher return over time.

SOLAR PUMP CONTROLLER SPECIFICATIONS

OUTBACK MPPT SOLAR PUMP CONTROLLER

Dedicated AC/DC MPPT controller designed specifically for submersible solar bore pumps. Optimises solar input under varying sunlight conditions while protecting the pump system from electrical and hydraulic faults. Designed for direct solar operation without batteries or inverters.

KEY FEATURES

- MPPT solar tracking for maximum daily water output
- Direct solar operation (no batteries or inverter required)
- Soft start to reduce mechanical and electrical stress
- Automatic restart after fault or low sunlight recovery
- Digital display for real-time system status
- Installer-friendly terminal layout

ELECTRICAL SPECIFICATIONS

Specification	Value
Controller Type	AC/DC MPPT Solar Controller
MPPT Efficiency	Up to 98%
Operating Voltage (Vmp)	60-165 V DC
Max Open Circuit Voltage (Voc)	450V DC
Maximum Input Current	10 A
Output	DC (matched to pump motor)

Voltage range varies by model. Refer to individual pump kit specifications.

INSTALLATION NOTES

- Verify solar panel open circuit voltage (Voc) does not exceed controller limits
- Follow recommended panel configuration only
- Mount controller in a shaded, ventilated location
- Ensure all connections are secure and weatherproof

INTEGRATED PROTECTION FUNCTIONS

- Dry-run protection
- Overcurrent and overload protection
- High and low voltage protection
- Thermal protection
- Reverse polarity alarm
- Automatic shutdown with auto-restart

CONTROL INPUTS & AUTOMATION

- Tank float switch (Normally Open – N/O)
- Pressure switch (Normally Open – N/O)
- Remote start / stop terminals

TYPICAL SYSTEM CONNECTION

HIGH EFFICIENCY N-TYPE SOLAR PANEL SPECIFICATIONS

OUTBACK 440-460 WATT BIFACIAL MODULE PANEL

Every solar panel supplied with an Outback Solar Pump kit is selected for durability, consistency, and long-term output, not just headline wattage. These panels are built to perform reliably in demanding outdoor environments where heat, wind, dust, and exposure are a daily reality.

N-TYPE TOPCON TECHNOLOGY

The N-type module with Hot 2.0 technology has better reliability and lower LID/LETID.

EXCELLENT ANTI- PID PERFORMANCE

Excellent Anti-Pid performance guarantee via optimized mass-production process and materials control.

SUPERIOR WEAK LIGHT PERFORMANCE

More power output in weak light condition, such as cloudy, morning and sunset.

HIGHER BIFACIALITY

Higher bifaciality, higher power output and lower BOS cost.

HOT 2.0 TECHNOLOGY

Better light trapping and current collection to improve module power output and reliability.

EXTREME WEATHER RESISTANCE

Module certified to withstand extreme wind (2400 Pascal) and snow loads (5400 Pascal)*.

LINEAR PERFORMANCE WARRANTY

15 YEAR
PRODUCT WARRANTY

30 YEAR
LINEAR POWER WARRANTY

***0.4% Annual Degradation over 30 Years**
***15 Year Product Warranty**
***30 Year Linear Power Warranty.**

KEY FEATURES

High Module Efficiency
Up to 22.5%

Low Temperature Coefficient
Better performance in heat

PID Resistance
Enhanced durability and reliability

Wind & Snow Load Certified
2400 Pa/ 5400 Pa*

Premium Build Quality
Robust frame and strict quality control

Lower LCOE
More energy yield and long-term savings

CERTIFICATIONS

CHINA QUALITY CERTIFICATION CENTRE
SOLAR PRODUCT CERTIFICATION

MAXIMUM ENERGY YIELD
More power output throughout the day, every day.

TRUSTED RELIABILITY
Built to perform in tough Australian conditions.

ENGINEERED TO LAST
Proven technology for long-term peace of mind.

SMART INVESTMENT
Lower operating costs and higher return over time.

SMARTER WATER. POWERED BY THE SUN.

Engineered for independence.
Built for the outback.

THE OUTBACK SOLAR PUMPS DIFFERENCE

We design and supply solar pumping solutions that deliver reliable performance where it matters most. Proudly Australian owned and operated, we understand the demands of remote living because we live it too.

AUSTRALIAN DESIGNED

Engineered specifically for harsh Australian conditions.

RELIABLE & BUILT TO LAST

Quality solar panels and proven designs you can depend on.

MAXIMISE WATER OUTPUT

MPPT technology extracts more power from your solar panels.

SIMPLE & EASY TO INSTALL

Straight forward setup with clear instructions and local support.

LOCAL SUPPORT

We're here to help before, during and after your purchase.

WARRANTY YOU CAN COUNT ON

All Outback Trailblazer kits are backed by comprehensive warranties for complete peace of mind.

2 YEAR PRODUCT WARRANTY

We stand behind our products with confidence.

30 YEAR LINEAR POWER WARRANTY

Long-term performance you can rely on.

BUILT FOR AUSTRALIAN CONDITIONS

DUST & SAND RESISTANT

EXTREME WEATHER TESTED

HIGH TEMPERATURE TOLERANT

CORROSION RESISTANT

*Full warranty terms and conditions available on our website.

“Outback Solar Pumps are our go-to for remote properties. Reliable, efficient and backed by real local support.”

– Outback Customer

“Installed our TRAILBLAZER kit last summer and it has been faultless. Great water pressure and simple to set up.”

– Verified Buyer

“Excellent product and service. The team really understands off-grid living. Highly recommended.”

– Outback Customer
